# STEPS TO RUN THE FILE IN GOOGLE COLAB NOTEBOOKS

STEP:1

- Sign in to your Gmail account.

- Take a new tab and search "Google colab notebooks" in google search.

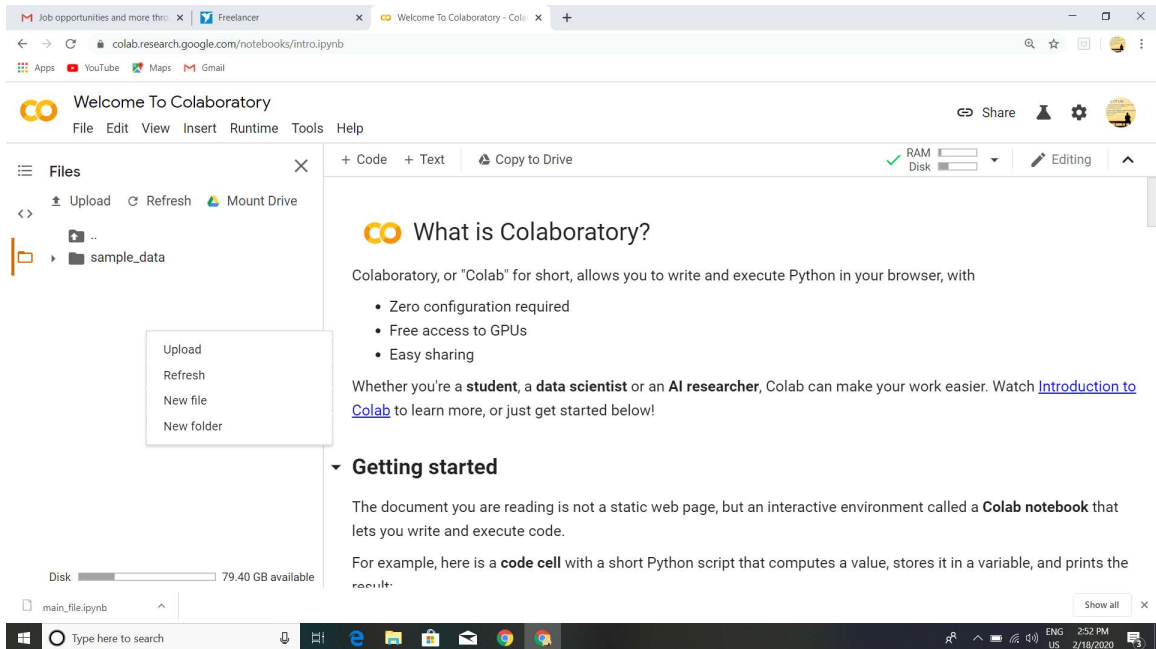

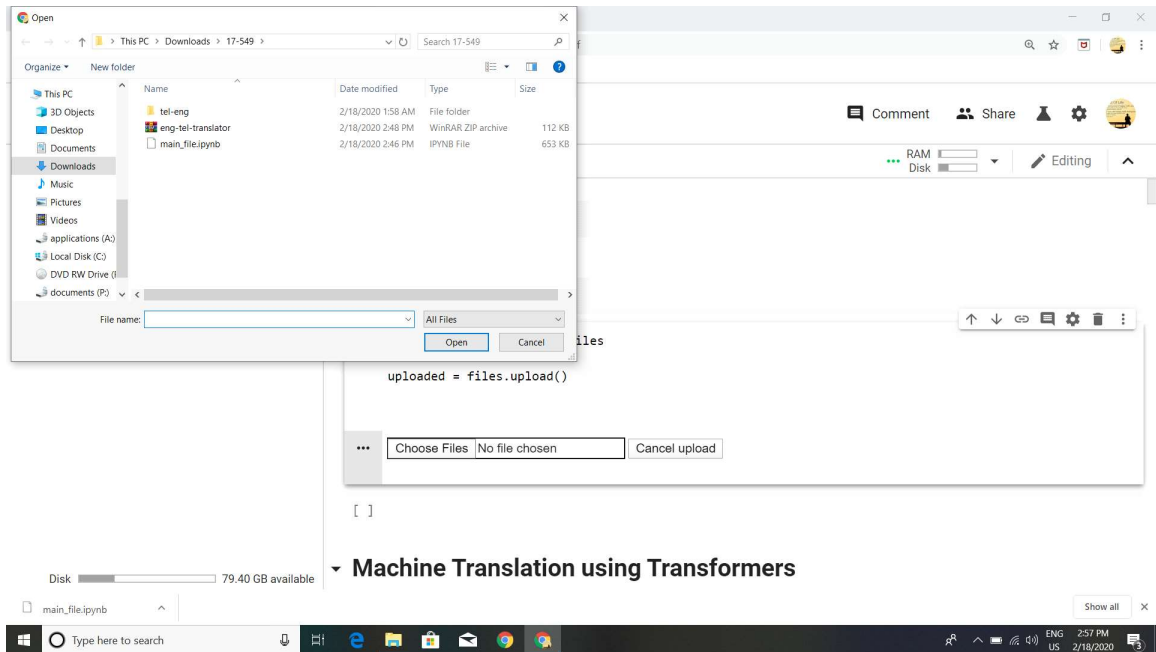

Go to Show notebooks in Drive-Google

STEP:2

- A new tab opens asking you to select file...Cancel it and come to the below page.

- Make sure you are signedin to colab notebooks with your gmail(the icon of the acount shown right below the gmail icon at the right side in the below picture) since all the code is saved to your drive.
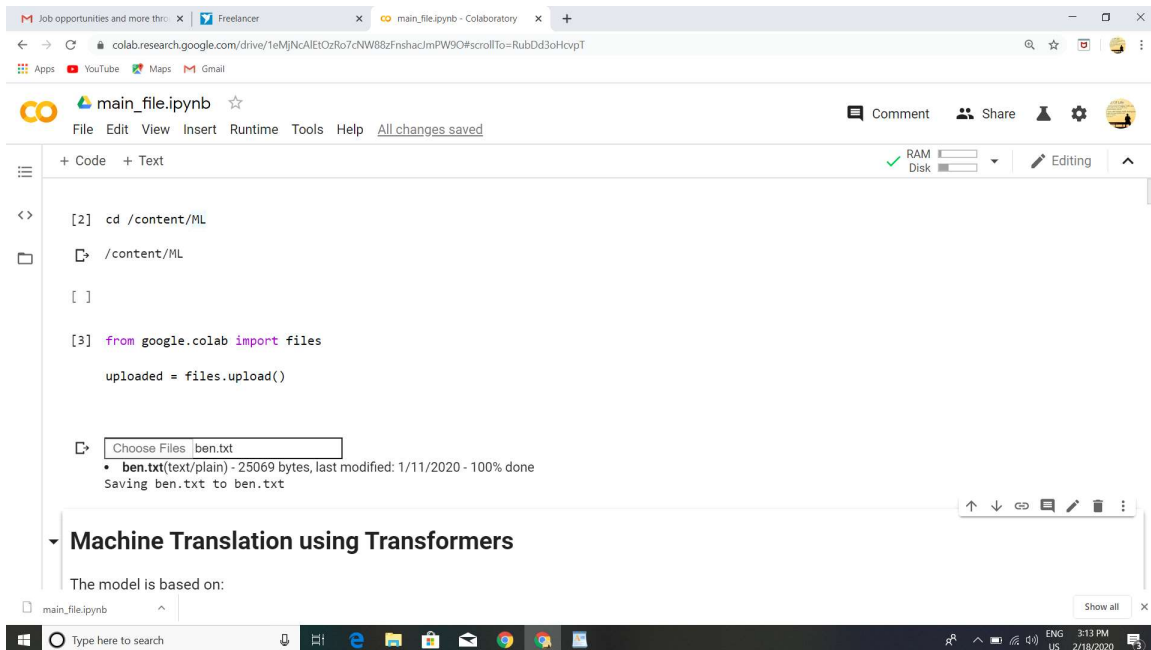

STEP:3

- Click on File->Upload notebook.... and select the new_file.ipynb file after extracting the Zip file.
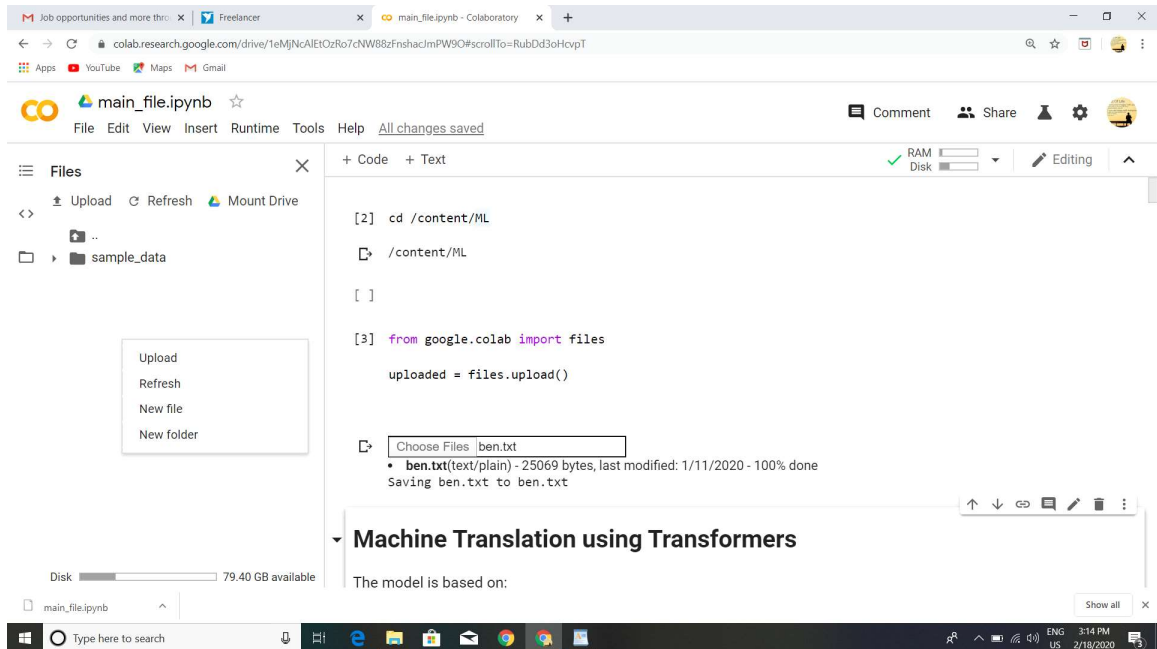

STEP:4

- Select the files folder at the left side

- Create a new folder named ML and run(select the code block and click ctrl+enter) the first code block.

STEP:5

- Now run the second code block and select the ben.txt(in a folder eng-tel in the unzipped file) file to upload**.**

- wait until it is uploaded 100%

STEP:6

Run the remaining blocks and folders are automatically generated.
